Figma, Adobe Photoshop, Adobe Premiere Pro

OTHER EXPERIENCE

Lowe's Home Improvement
Tulsa, Oklahoma
Head Cashier
February 2024 - Present

SUMMARY

I'm a Full-Stack Developer and UX Designer who bridges the gap between complex problem-solving and clean, accessible code. Beyond software, I bring a strong technical interest in IT infrastructure and desktop support, focusing on how robust ticketing systems and hardware reliability underpin any great user interface.

EDUCATION

Atlas School	Diploma
Computer Science & Full-Stack Web Development	April 2024 - December 2025

20 months of rigorous, hands-on training designed to mirror a real-world engineering environment. This accelerated program equipped me with a versatile toolkit, moving from foundational C programming into specialized Full-Stack development and DevOps integration.

PROJECTS

Aeroduel (Capstone Project)
- Developed a high-fidelity interaction model for RC flight simulations, prioritizing situational awareness to create a friction-free experience for the operator. - Developed a responsive React Native dashboard prioritized for managing complex data streams while practicing the best principles of UX & UI.
https://aeroduel.com
Custom API
- Developed a high-performance search experience by designing a custom API that organizes complex relationships into a logical, easily navigable schema. - Designed a minimalist, distraction-free interface centered on high-density information retrieval, prioritizing clean typography to ensure users can access key data without visual friction.
